## Macrofan **AVANTAGE** UHS Clearcoat

Energy saving and process speed:  
everywhere and for everyone!  
Lots of ADVANTAGES from  
one single product!

Caring about the differences!

# NO LIMITS!

One **EFFICIENT** solution under **ALL** conditions

**15°C...25°C...35°C**

## Macrofan **AVANTAGE** UHS Clearcoat

**Ultra High Solids clearcoat with a wide range of utilisation and fast drying.**

It is the **FAST** drying clearcoat with **REDUCED ENERGY CONSUMPTION**, useable under **ALL** conditions and for **ALL** types of repairs.

**MC404** also includes specific additives **AVANTAGE HT** which make it **USABLE** under **EXTREME APPLICATION CONDITIONS**, without giving up on final quality and fast drying:

**MH404** MACROFAN **AVANTAGE** CLEAR **HT** HARDENER  
**MT404** MACROFAN **AVANTAGE** CLEAR **HT** ADDITIVE

Lechler proposes a new product allowing repairs **with a low energy consumption** for large surfaces (until complete car repair), even under critical application conditions (>30°C).

Maximum application versatility: extremely easy and flexible in application, it allows you to obtain excellent final results under all environment conditions (temperatures and spray booths)

- **Fast drying by low baking**, also in restricted drying processes and in all types of spray booths
- **Good performance by air drying**, especially in its typical conditions of use (high T°C)
- **Very good hardness and surface slipperiness**, which allow effective polishing
- **Low environmental impact**, VOC < 420 g/l - in compliance with the directive 2004/42/CE.

MC404 allows you to reduce **ENERGY COSTS**, which affect ever more the total repair cost, including the normally most "critical" situations, thus turning everything into #ALLVERYEASY.

MC404 Macrofan AVANTAGE UHS Clearcoat belongs to the product line selected for the high efficiency painting processes in the LECHLER SYSTEM.

**There is no right process for all repairs, but there is a right process for every repair.**
