

THE
DIFFERENCE
IS DEBEER
FAST
UNCOMPROMISED DRYING

8-814 FAST PERFORMANCE CLEAR AND
8-810 FAST PERFORMANCE HARDENER

DEBEER
REFINISH

FAST DRYING WITH ZERO COMPROMISES

DeBeer Refinish is committed to delivering innovative products that increase body shop productivity and improve overall profitability. Using the latest technology, DeBeer has formulated a new fast-drying clear that dries in just 10 minutes at 60°C and can be applied in one visit.

Designed for waterbased basecoats, the 8-814 Fast Performance Clear delivers outstanding results when used with the DeBeer WaterBase 900* Series. As part of our VOC-compliant system, it comes with a dedicated hardener, 8-810 Fast Performance Hardener and works seamlessly with existing DeBeer thinners.

Zero compromise

The 8-814 Fast Performance Clear dries in just 10 minutes, but, unlike other fast-drying clears, which are limited to small, fast repairs. This clear delivers a flawless finish on spot repairs and medium sized jobs - up to 5 panels, complete front end or complete side. The long application window ensures more working time with the product, increasing throughput and overall efficiency of the repair process while significantly reducing energy consumption.

How to order

8-814 Fast Performance Clear and 8-810 Fast Performance Hardener are available now. The information you will need to order this product is summarised below.

User-friendly

The 8-814 Fast Performance Clear offers extreme ease of use and application. The 2:1 mixing ratio ensures quick and simple preparation, while the resin makes it user-friendly and easy to apply. Good spray properties allow for excellent flow and levelling, delivering a high gloss final finish with excellent appearance.

Fast and flexible drying

Drying in 10 minutes is not the only characteristic that sets the 8-814 Fast Performance Clear apart. It offers fast air-drying (20°C) properties with a dry-to-handle time of just 60 minutes or low baked (40°C) in half the time. Its flexibility allows body shops to save time, resources, and energy without compromising on performance or usability.
